Milu PIR Sensor (12V)

Code: 8060

Features

- The Milu PIR 12V Sensor automatically activates Milu's odour control system so odours are eliminated no matter what.
- Once motion is detected within range, the Odour Control System is activated and remains on while motion is present. When motion is no longer present the fan runs for 4 minutes before turning off.
- Sensor field of view has been designed to function within a small space to isolate the operating zone and minimise false triggers.

Installation

- Designed for installation on the ceiling above the toilet (70mm circular ceiling cut-out)
- 2mm DC plug and socket for easy connection
- Designed for the range of Milu Odourless Toilets
