

SIKALASTIC 152 25KG PART B

Description

Sikalastic 152 is a two-component, liquid-applied, seamless, and highly elastic waterproofing system designed for use under tile. It is manufactured by Sika, a global leader in the construction industry.

Sikalastic 152 is a cement-based waterproofing membrane that offers excellent adhesion to various substrates, including concrete, cementitious screeds. It is a durable and flexible system that can withstand both static and dynamic stresses.

Sikalastic 152 is designed to be used as a waterproofing membrane under tiles in areas such as bathrooms, kitchens, and balconies. It creates a seamless, joint-free surface that provides long-lasting protection against water damage, including leaks and moisture penetration.

Overall, Sikalastic 152 is a high-quality waterproofing solution that is trusted by professionals in the construction industry. Its excellent performance, versatility, and ease of application make it an ideal choice for any tile installation project that requires reliable waterproofing.
