

SIKASIL LIGHT GREY SILICONE 300ML

Description

An acetic-crosslinking silicone sealant that is solvent-free and resistant to mildew. Sikasil Color reacts on contact with the humidity in the air, and cures into a permanently elastic, rubbery substance. Sikasil Color can be used as a sealant for glass, ceramics, anodized aluminium and epoxy or polyester panels. It is suitable for application in health/hygiene areas for forming expansion joints between tiles, tubs, sinks, for sealing showers and forming expansion joints between walls and floors. Ideal for use with the Sika Ceram range of tiling grouts and adhesives.
