

VODA GOOSENECK PULLOUT SINK MIXER - CS BRUSHED BRASS (PVD)

Description

The new Voda Gooseneck Pull Out Sink Mixers are constructed from lead-free 304 Stainless Steel and feature a pull out hand piece with Cold Start Technology.

Available in a selection of finishes including Brushed Brass, Brushed Gunmetal, Chrome and always chic Matte Black. Constructed from solid stainless steel offering unrivalled durability, giving you hard-wearing, functional tapware combined with beautiful design. Also available in our original Brushed Stainless finish as VSS015 Stainless Gooseneck Minimal Pull Out Sink Mixer

The slim pin lever gives a minimal look and the mixer has been engineered so that you only turn on cold water when the lever is in the upright start position. This results in reduced hot water consumption, and also allows the mixer to be installed closer to the wall if required as the lever doesn't get pushed back towards the wall during operation. Our new Brushed Brass and Brushed Gunmetal colour options feature a Physical Vapour Deposition (PVD) coating that is highly resistant to tarnishing and corrosion, making them ideal for tapware.

This new PVD coating technology allows us to extend a 5 Year Warranty on finish on all of our PVD coated products, alongside our comprehensive 10 Year product Warranty.
